:: SKETCH FLOOR PLAN IN GRID BELOW ::

[homepixmedia@yahoo.com](mailto:homepixmedia@yahoo.com)

INSTRUCTIONS

1. Start out by drawing the exterior walls making sure to note any windows, doors, decks and porches. Label all areas.
2. Next, go inside and start in one corner working your way around the home, taking measurements (if needed) and sketching the room layout. Make sure to note any doorways in each room and any special features.
3. If there is more than one level make sure you leave space on the grid to fit both levels, or just print off another grid page for that level.
4. Make sure to note all appliances and fixtures, mostly in kitchens and bathrooms, using the designated symbols below.
5. If there is an item not listed below feel free to draw your own symbol, just make sure it is easy to understand.
6. Once you are satisfied with your drawing, use a scanner to load it on your computer or, if you don't have a scanner, you can take a picture with a digital camera as long as the image is clear and easy to read.
7. Once the floor plan is on your computer email it to [homepixmedia@yahoo.com](mailto:homepixmedia@yahoo.com) as an attachment. We will get started immediately on drafting your floor plan, and you should expect to receive it within 48 hours.
